

THE ALL-IN-ONE TECH TOOL FOR FFLS

Built on the world's #1 Cloud-ERP, **BSP's American Firearms Edition of Oracle NetSuite** features pre-configured industry specific enhancements and seamless ATF compliance workflows in one powerful package.

We've spent the last five years engaged with FFL Regulated Manufacturers and Distributors, FFL Technology Leaders, and Industry Trade Association Reps to gain valuable insights and build robust functionality.

The core integration between NetSuite and Orchid eBound allows for seamless compliance for all firearms transactions with a single point of entry. But this is more than an Integration... BSP & Orchid have built the most robust, firearm industry-ready ERP. It's designed by the leaders in ATF Compliance, and guaranteed against ATF Revocation.
